

Install GSE Smart IPTV Pro on iOS and Mac

Follow these steps to install GSE Smart IPTV Pro on an iPhone, iPad or Mac and add your IPTV account.

1. Download GSE Smart IPTV Pro

iPhone and iPad:

```
https://apps.apple.com/us/app/gse-smart-iptv-pro/id6443923265
```

Mac:

```
https://apps.apple.com/us/app/gse-smart-iptv-pro/id1293083751?mt=12
```

1. Open the correct App Store link for your device.
2. Confirm the app is **GSE SMART IPTV PRO** by **droidvision**.
3. Select the displayed price, **Buy** or **Get**, then open the app after installation.

The iPhone/iPad and Mac apps use separate listings. Mac requires macOS 10.12 or later and may require a separate purchase.

2. Add your IPTV account

1. Allow any permissions requested by the app.
2. Open the **three-line menu** or left sidebar.
3. Select **Xtream-Codes API**.
4. Select **+** to add an account.
5. Enter the details supplied by your IPTV provider:

```
Playlist Name: My IPTV  
Server URL: http://your-server-address.com:port  
Username: YOUR USERNAME  
Password: YOUR PASSWORD
```

1. Select **Add**, **Update** or **Login**.
2. Wait for the channels, movies, series and TV guide to load.
3. Open the playlist and select **LIVE** or **VOD**.

The server URL must include the correct `http://` or `https://` and port number, with no extra spaces.
