

Install IPTV Extreme on a Firestick

These steps require an Android-based Fire OS device that supports APK installation.

1. Install Downloader

1. From the Firestick home screen, select **Find → Search**.
2. Search for **Downloader**.
3. Select the orange **Downloader by AFTVnews** app.
4. Select **Download/Get**, then **Open**.

2. Allow APK installations

1. Go to **Settings → My Fire TV → Developer Options → Install Unknown Apps**.
2. Select **Downloader** and switch it **ON**.

If **Developer Options** is missing:

1. Go to **Settings → My Fire TV → About**.
2. Highlight your Fire TV device name.
3. Press the remote's **Select/OK** button seven times.
4. Press **Back**, then open **Developer Options**.

3. Install IPTV Extreme

1. Open **Downloader**.
2. Select **Allow** if permission is requested, then close the welcome message.
3. Select the address box and enter:

7773498

1. Select **Go** and wait for the download page to open.
2. Confirm that the page or file clearly says **IPTV Extreme**, then start the download.
3. When the installation screen appears, select **Install**.
4. Once installed, select **Done**.
5. In Downloader, select **Delete**, then **Delete** again to remove the installation file.

4. Log in

1. Open **IPTV Extreme** from your Firestick apps.
2. Select **Allow** if the app requests permission.
3. Open the **three-dot menu** : in the top-right corner.
4. Select **Playlists → Add Playlist**.
5. Select **Xtream Codes Portal** or **Xtream Codes Login**.
6. Enter the details supplied by your IPTV provider:

Playlist Name: My IPTV
Server URL: http://your-server-address.com:port
Username: YOUR USERNAME
Password: YOUR PASSWORD

1. Select **OK, Save** or **Add Playlist**.
2. Wait for the channels, movies, series and TV guide to load.
3. Select your playlist to begin watching.

IPTV Extreme supports Xstream Codes playlists on version 107 and newer. Make sure the server URL includes the correct `http://` or `https://` and port number, with no extra spaces in any field.
