

Install IPTV Extreme Pro on Android TV

Install the verified Paolo Turatti app, add an authorised Xstream Codes-compatible portal or M3U playlist, then refresh the EPG.

Official sources

Official Google Play listing: <https://play.google.com/store/apps/details?id=com.pecana.iptvextremepro>

Official IPTV Extreme downloads: <https://iptvextreme.eu/downloads>

1. Install the correct app

1. On Android TV or Google TV, open Google Play and search for **IPTV Extreme Pro**. Confirm the developer is **Paolo Turatti** before purchasing or installing.
2. Use the official downloads page only when Google Play is unavailable. Avoid similarly named APKs from third-party mirrors.

2. Add an Xstream Codes-compatible portal

1. Open the app, open the three-dot menu, choose **Playlists**, select **Add Playlist**, then choose **Xstream Codes Portal**.
2. Enter a playlist name, server address, username and password exactly as supplied. Include the correct protocol and port, then select **OK**.

3. Add an M3U or M3U Plus URL

1. Open **Playlists** and choose **Add Playlist**, then select **File or Link Playlist**.
2. Enter a clear playlist name, paste the complete M3U/M3U Plus address and save it.

4. Load the channels and guide

1. Allow the initial playlist import to finish. If the list remains empty, restart the app or use its refresh command.
2. When a separate XMLTV EPG URL was supplied, add it in the EPG settings and force a guide refresh.

5. Test before changing advanced settings

1. Open several channels and VOD items using the default decoder first. Change hardware/software decoder or buffer options only when a repeatable problem remains.
2. When the same credentials work in another player, clear IPTV Extreme Pro cache or data, sign in again and retest on the same network.

Important: The Pro listing is a paid app and does not contain channels. Confirm the developer name before purchase. Keep server, username and password details private.

Player apps do not include channels or a subscription. Only use playlists and streams you are authorised to access. Instructions and official sources checked 30 July 2026.
