

Install IPTV Extreme Pro on Android

1. Download the app

Use one of these official options:

- **Recommended:** [IPTV Extreme Pro on Google Play](#)
- **Official APK:** [IPTV Extreme Downloads](#)

Google Play

1. Open the Google Play link.
2. Confirm the developer is **Paolo Turatti**.
3. Select the displayed price/**Buy**, complete the purchase, then select **Install → Open**.

Official APK

1. Open the official downloads page.
2. Select the latest **Pro** version and the correct architecture for your device.
3. Download the APK.
4. If prompted, allow your browser or file manager to **Install unknown apps**.
5. Open the downloaded APK and select **Install → Open**.

The official IPTV Extreme portal currently lists version **130** as the latest release.

2. Add your IPTV login

1. Open **IPTV Extreme Pro** and allow any required permissions.
2. Select the **three-dot menu** : in the top-right corner.
3. Select **Playlists → Add Playlist**.
4. Select **Xtream Codes Portal**.
5. Enter the details supplied by your IPTV provider:

Playlist Name: My IPTV
Server: http://your-server-address.com:port
Username: YOUR USERNAME
Password: YOUR PASSWORD

1. Leave the remaining settings unchanged and select **OK**.
2. Wait for the playlist, channels and TV guide to load.
3. Select the playlist to begin watching.

The app supports Xtream Codes playlists on version 107 and newer.

If you received an M3U Plus URL

1. Go to : → **Playlists** → **Add Playlist**.
2. Select **File or Link Playlist**.
3. Enter any playlist name.
4. Paste the complete **M3U Plus URL**.
5. Select **OK** and wait for it to load.

If nothing appears, restart the app or select : → **Refresh**. Make sure the server address includes `http://` or `https://`, the correct port, and no extra spaces.

Only use playlists and content you are authorized to access.
