

# Install IPTV Smarters on Android TV or Google TV

Install from the official source, then sign in with an authorised Xstream Codes-compatible account or M3U playlist.

## Official sources

Official IPTV Smarters downloads: <https://www.iptvsmarters.com/#downloads>

Official Android APK: <https://www.iptvsmarters.com/iptv-smarters-5.0.apk>

## 1. Check the device and login details

1. Confirm the television or box runs **Android TV** or **Google TV**, not Samsung Tizen, LG webOS or VIDAA.
2. Have the exact server URL, username and password ready, or the complete M3U/M3U Plus URL. Keep these details private.

## 2. Install from an official source

1. Open the official downloads page above and use the Android or Android TV route currently provided. Store availability can vary by device and country.
2. When no verified store listing is available, install **Downloader** from Google Play, open the official APK URL above and download the file.
3. If Android blocks the APK, allow Downloader under **Install unknown apps** only long enough to install it, then switch the permission off again.

## 3. Add an Xstream Codes-compatible account

1. Open the app and choose **Login with Xstream Codes API** or the equivalent **Add User** option.
2. Enter a profile name, server URL, username and password exactly as supplied. Include **http://** or **https://** and the port when provided.
3. Select **Add User** or **Login**, then allow Live TV, movies, series and guide data to finish loading.

## 4. Add an M3U playlist instead

1. Choose **Load Your M3U File/URL** when you received one complete playlist address.
2. Paste the full M3U or M3U Plus URL. Add a separate XMLTV EPG URL only when supplied and requested by the app.

## 5. Complete the first playback test

1. Open several live channels, one VOD item and the programme guide. Let the first import finish before judging the app.
2. When login fails, recheck spelling, protocol, port and accidental spaces before changing decoder or network settings.

**Safety:** Smarters-style names are frequently copied. Use only a store page linked from the official website or the official APK above. Do not install modified or "premium unlocked" APKs.

Player apps do not include channels or a subscription. Only use playlists and streams you are authorised to access. Instructions and official sources checked 30 July 2026.
