

Install OTT Navigator on a Firestick

These steps work on Android-based Fire OS devices that support APK installation. They do not apply to Fire TV devices using Vega OS.

1. Install Downloader

1. From the Firestick home screen, select **Find > Search**.
2. Search for **Downloader**.
3. Select the orange **Downloader by AFTVnews** app.
4. Select **Download/Get**, then **Open**.

2. Allow APK installations

1. Go to **Settings > My Fire TV > Developer Options > Install Unknown Apps**.
2. Select **Downloader** and switch it **ON**.

If **Developer Options** is missing:

1. Go to **Settings > My Fire TV > About**.
2. Highlight your Fire TV device name.
3. Press the remote's **Select/OK** button seven times.
4. Press **Back**, then open **Developer Options**.

3. Install OTT Navigator

1. Open **Downloader** and select **Allow** if requested.
2. Close the welcome message, then select the address box.
3. Enter the official OTT Navigator Downloader code:

982469

1. Select **Go** and wait for the official download page to open.
2. Confirm that the page or file clearly identifies **OTT Navigator**.
3. Download the standalone APK, then select **Install**.
4. When installation finishes, select **Done**.
5. In Downloader, select **Delete**, then **Delete** again to remove the APK.

4. Add your IPTV provider

1. Open **OTT Navigator** from your Firestick apps.
2. Open **Settings**, select **Provider**, then choose to add a provider.
3. Choose the **Xtream Codes** template when you received a server URL, username and password. Choose **Playlist** when you received a complete M3U or M3U8 URL.

For an Xtream Codes login, enter:

```
Provider name: My IPTV
Server URL: http://your-server-address.com:port
Username: YOUR USERNAME
Password: YOUR PASSWORD
```

1. Save the provider and wait for the channel list to finish loading.
2. For M3U setup, paste the complete remote playlist URL.
3. When a separate XMLTV guide URL was supplied, open the provider settings, find **EPG**, add the URL and reload the guide.
4. Return to the main screen, open a category and test one live channel.

Login not working? Check the server protocol and port, confirm that usernames and passwords are entered exactly, and remove extra spaces.

After installation: You may switch off Downloader under **Install Unknown Apps**. Keep player, decoder and buffer settings at their defaults until basic playback is working.

OTT Navigator is a media player only and does not include channels or a subscription. Only use playlists and streams you are authorised to access.
