

Install Televizo on Android TV, Phone or Tablet

Follow these steps to install Televizo and create either an M3U playlist or an Xstream Codes-compatible playlist on an Android device.

Official downloads

Official Televizo website:

<https://televizo.net/>

Google Play listing:

<https://play.google.com/store/apps/details?id=com.ottpay.ottpay>

The official Televizo website also provides an APK route and lists Downloader code **474318** for supported TV devices.

1. Install Televizo

1. Install **Televizo - IPTV player** by **Andrey Menscikov** from Google Play, or use the official website when a direct APK is required.

2. Create a playlist

1. Open Televizo and select **Create Playlist**. Continue past the player-only notice if it appears.
2. Choose **New Xstream Codes Playlist** for a server URL, username and password, or choose **New M3U Playlist** for a complete playlist URL.

3. Enter the details

1. **Xstream Codes:** enter a playlist name, server URL, username and password.
2. **M3U:** enter a playlist name and paste the complete M3U/M3U Plus URL.

4. Save the playlist

1. Select the checkmark or **Save**. Wait for the channel list and categories to finish loading before opening a stream.

5. Add EPG when supplied separately

1. Edit the playlist or open its EPG settings, add the XMLTV URL and refresh the guide. An EPG may already be referenced inside the M3U playlist.

Important: Use the exact server protocol, port, username and password supplied. Remove accidental spaces before saving.

IPTV player apps do not include channels or a subscription. Only use playlists and streams you are authorised to access.
