

Install TiviMate on a Firestick

These steps work on Android-based Fire OS devices that support APK installation. They do not apply to Fire TV devices using Vega OS.

1. Install Downloader

1. From the Firestick home screen, select **Find > Search**.
2. Search for **Downloader**.
3. Select the orange **Downloader by AFTVnews** app.
4. Select **Download/Get**, then **Open**.

2. Allow APK installations

1. Go to **Settings > My Fire TV > Developer Options > Install Unknown Apps**.
2. Select **Downloader** and switch it **ON**.

If **Developer Options** is missing:

1. Go to **Settings > My Fire TV > About**.
2. Highlight your Fire TV device name.
3. Press the remote's **Select/OK** button seven times.
4. Press **Back**, then open **Developer Options**.

3. Install TiviMate

1. Open **Downloader** and select **Allow** if requested.
2. Close the welcome message, then select the address box.
3. Enter the official TiviMate Downloader code:

272483

1. Select **Go**. Confirm that the download page shows **tivimate.com**.
2. Download the TiviMate APK, then select **Install**.
3. When installation finishes, select **Done**.
4. In Downloader, select **Delete**, then **Delete** again to remove the APK.

Official alternative: enter `tivimate.com/apk` in Downloader.

4. Add your IPTV account

1. Open **TiviMate** from your Firestick apps.
2. Select **Add playlist**.
3. Choose **Xtream Codes** when you received a server URL, username and password.
Choose **M3U playlist** when you received one complete playlist URL.

For an Xtream Codes login, enter:

```
Playlist name: My IPTV
Server URL: http://your-server-address.com:port
Username: YOUR USERNAME
Password: YOUR PASSWORD
```

1. Select **Next** or **Done** and wait for the playlist to finish loading.
2. For M3U setup, paste the complete M3U or M3U Plus URL. Add the separate XMLTV EPG URL only when one was supplied.
3. Open the TV guide and test a live channel.

Login not working? Check the full server address, including `http://` or `https://` and the port. Remove spaces before or after every field.

After installation: You may switch off Downloader under **Install Unknown Apps**. TiviMate is designed for TV devices and remote controls; it is not optimised for phones or tablets.

TiviMate is a media player only and does not include channels or a subscription. Only use playlists and streams you are authorised to access.
